Abstract (en)

[origin: WO2011131428A1] The invention relates to a feeding apparatus (20) for a high-pressure roller press (100) for the high-pressure comminution of material to be ground (10), which apparatus feeds the material to be ground (10) in a controlled manner into a roller nip (11) between two rollers (101, 102) of the high-pressure roller press (100). Provision is made for the feeding apparatus (10) to have at least one material feed (30) with a vertically adjustable material chute (40) and a material overflow device (60).
