Abstract (en)
[origin: WO2011131435A1] The invention relates to a modular supporting frame (2) and in particular a subassembly for a plant for casting and/or bending a metal strand, in particular for a curved mold continuous casting plant, the plant comprising a supporting frame (2) and the subassembly in turn comprising at least two segment supports (3) which form part of the supporting frame (2) of the plant and further comprising segments which can be connected to the segment supports (3) and which each comprise a roller assembly for guiding the metal strand. According to the invention, the segment supports (3) are designed such that said supports each support exactly one segment.
