Abstract (en)

[origin: WO2011131483A1] The invention relates to a cartridge that is capable of standing, comprising at least one receiving chamber (2) extending in the longitudinal direction for a medium to be discharged, a cartridge base (4) and a cartridge wall (3), which delimit the receiving chamber (2), wherein the cartridge (1) is produced by means of a thermoforming method or a blow molding method and is designed to be collapsible in a controlled manner. The invention further relates to a discharge device for at least one cartridge (1) according to the invention, comprising a support cartridge (20) for receiving the at least one cartridge (1), a closure unit (40) on a first axial end, and a discharge plunger (50) on a second axial end of the support cartridge (20) for collapsing the at least one cartridge in a controlled manner.
