Abstract (en)

[origin: WO2011131455A2] The invention relates to a door leaf (6, 7) for a refrigerator (1), having an outer wall (12), an inner wall (11), two side walls (13), walls which adjoin the side walls (13) and engage behind the outer wall (12), and an upper and a lower door termination strip (20), which delimit a hollow space filled with a heat-insulating material. At least one of the walls is designed as an, in particular semicircular, bending contour (18) which adjoins the relevant side wall (13), and at least one of the door termination strips (20) has an, in particular integrally formed, pin (21), which engages positively into the bending contour (18).
