Abstract (en)

[origin: WO2011128177A1] Connection apparatus for connecting electrical devices, in particular electric motors, in particular to an AC system, with a housing (1) with a housing lower part (2) and a housing upper part (3), wherein a plurality of multiple terminals (8, 9, 10, 11) are arranged in the housing (1), said multiple terminals each having at least one or two or more conductor terminals (15, 16) and second terminals (17, 18, 19), which are electrically conductively connected thereto, with a configuring plug (23) for conductively connecting individual or a plurality of the multiple terminals (8, 9, 10, 11) in at least two different positions for realizing at least two different circuit types.
