Abstract (en)

[origin: EP2562061A1] The vehicle (1) has a longitudinal body (10) receiving an interior equipment jointly assembled to the longitudinal body and comprising a roof (14). The roof is formed with an access opening (2) at an end of the longitudinal body and provided with a reinforcement framework. The access opening allows passage of the interior equipment within the longitudinal body. The reinforcement framework surrounds the access opening. The access opening is closed in a removable manner by a removable roof cap arranged to cooperate with the reinforcement framework by complementarity of shapes.
