Abstract (en)
The present application provides a turbine nozzle vane retention system (100). The turbine nozzle vane retention system (100) may include a number of nozzles (120) with a platform (150), a slot (230) extending into the platform (150), and a pin (280) extending between the slot (230) of a first nozzle (121) and the slot (230) of a second nozzle (122).
