Abstract (en)

[origin: EP2563008A2] Provided is a method and apparatus for performing video communication in a mobile terminal, by which during video communication in the mobile terminal, a panoramic image can be created and provided. To this end, a method for performing video communication in a mobile terminal includes transmitting image data captured by at least two cameras during video communication to a server, if receiving image data associated with the captured image data from the server, creating a panoramic image by using the captured image data and the associated image data, and transmitting the created panoramic image to another mobile terminal which is performing the video communication.
