Abstract (en)
[origin: WO2011135207A1] The present invention relates to a method for manufacturing a non-slip container (30) from a ceramic or glass container (20) having an end wall (21) that is intended to be in contact with a flat support, said end wall having at least one non-slip pattern (28), said pattern comprising two furrows (25) that delimit at least one protrusion (24), said method comprising the following steps: - a non-slip material (34) in the fluid state is applied to the non-slip pattern (28) so as to at least partially cover the protrusion, - the non-slip material is solidified so as to form a non-slip coating (31).
