Abstract (en)
[origin: WO2011135154A1] A game controller apparatus for playing an electronic game, the game controller apparatus comprising a seat (2) which is adapted to receive a player of the electronic game. The game controller apparatus is adapted to cooperate with a sensor board (4) for playing the electronic game, the sensor board (4) comprising sensor means (6) adapted to detect several different types of pressing events directed at a top surface of the sensor board (4), the sensor board (4) being adapted to control the electronic game based on pressing events detected by the sensor means (6). The seat (2) comprises contact means (8) operatively connected to a bottom surface of the seat (2), the contact means (8) being capable of co-operating with the sensor board (4) such that the player of the electronic game may, while in the seat (2), play the electronic game by tilting the seat (2).
