Abstract (en)
[origin: WO2011134443A2] Nailing machine (2) for nailing wooden parts, such as palettes, wooden boxes and indented beams, where the pressing ram (3) is movable in vertical axis, the machine (2) comprises electromechanical actuators (1) for exerting mechanic pressure on the pressing ram (3). Further, the pressing ram (3) pushes the sliding bars of the hammers (4), thereby pressing the nails into wooden parts (6). The electromechanical actuator comprises a sliding rod (7), a solid part (8) with flanges for mounting to the machine (2) frame and for mounting to a spacer (9) of the drive unit (10).
