Abstract (en)
[origin: WO2011135306A1] A modular fibre reinforced plastic flange <(5)> for a structural composite beam <(10)> which compresses a body <(40)> formed of a plurality of elongate elements <(42)> arranged in an array, wherein the dimensions of the body are substantially determined by the number and arrangement of the elongate elements in the array, and a skin member <(20,30)> at least partially surrounding the array. Also, a structural composite beam comprising the modular fibre reinforced plastic flange <(5)> and a shear web <(50)> connected to the skin member of the modular flange. A method of making the modular flange and beams, and a kit of parts for making the modular flange are also disclosed.
