Abstract (en)  
[origin: WO2011135218A1] The invention relates to a vehicle seat (1) including a backrest (10) capable of pivoting between a normal position of use and a position folded up toward the front, around a first horizontal axis (30, 30a). Said vehicle seat is characterized in that the backrest is also capable of pivoting, between the normal position of use and a position of longitudinal compartmentalization from the vehicle, around a second axis (40, 40a) contained in a plane perpendicular to the first axis (30, 30a).
