Abstract (en)

[origin: WO2011135208A2] The present invention relates to a method for constructing covered tanks for terrestrial agriculture of photosynthetic organisms and to the associated device made up of a very long gutter which acts simultaneously as a wall common to two juxtaposed tanks, as a support for the cover of the tanks, as a walkway for operating personnel and as a receptacle for rainwater. The invention is particularly suitable for the equipment of large farms dedicated to the production of algae or other photosynthetic organisms.
