Abstract (en)

[origin: WO2011128497A1] Device (1) for making a rope hitch, for example for securing a rope (30) holding a boat's fender to the rail or other similar structures of the boat and formed of an elongated piece (1) containing no moving parts. The device comprises parts (8, 9, 10) for the permanent attachment of a rope (3) on one edge and, on the other edge, parts (11, 12, 13) permitting a detachable attachment of the rope. Also a method is disclosed.
