Abstract (en)
[origin: WO2011134737A2] The invention relates to a refrigerating appliance comprising a body (1), a mounting part (3) that is fixed to the body (1) and carries a door bearing journal (11), and a door (2) that can be pivoted about the door bearing journal (11). The mounting part (3) carries an abutment projection (9). In an open abutted position of the door (2), a limiting body (13) mounted on the door (2) in a rotatably fixed manner butts up to the abutment projection (9).
