Abstract (en)

[origin: WO2011136786A1] Various embodiments of systems, methods, and computer programs are disclosed for providing a conference user interface. One embodiment is a method for providing a conference. One such method comprises: a conferencing system establishing an audio conference between a plurality of participants via a communication network; the conferencing system presenting a conference interface to the participants via a graphical user interface and a corresponding client device in communication with the conferencing system via the communication network; and the conference interface displaying a unique participant object identifying each of the plurality of participants in the audio conference according to a graphical representation specified by the corresponding participant.
