Abstract (en)  
[origin: WO2011136794A1] Various embodiments of systems, methods, and computer programs are disclosed for recording and playing back an online conference. One such method comprises: a conferencing system establishing an audio conference between a plurality of participants accessing the conferencing system via a communication network; the conferencing system presenting the audio conference and a conference interface displaying a participant object identifying each of the participants in the audio conference; synchronously recording the audio conference with content presented in the conference interface; storing the synchronized audio conference and content; and playing back the synchronized audio conference and content.
