Abstract (en)
[origin: WO2011131408A1] The invention relates, inter alia, to a transformer comprising a transformer core (20) having transformer core laminations, at least one high-voltage coil and at least one low-voltage coil (100), wherein a core limb (120) of the transformer core passes through the low-voltage coil. According to the invention, the low-voltage coil is held by the core limb with at least one fixing pin (200, 210).
