Abstract (en)
[origin: EP2564729A1] The present invention relates to a household appliance. The household appliance comprises a housing (70), having an inner space (72); a carrying device (10), withdrawably installed in the inner space (72), the carrying device (10) comprising a first connection portion (16); and a guide rail (20), fixed between the housing (70) and the carrying device (10) so as to allow the carrying device (10) to be pulled out of or pushed into the inner space (72), the guide rail (20) further comprising a second connection portion (26) for mating with the first connection portion (16). According to the proposal of the present invention, at least one of the first connection portion (16) and the second connection portion (26) is inserted into the other of the first connection portion (16) and the second connection portion (26) in a front-rear direction for connection.
