Abstract (en)

[origin: EP2565098A1] The transition structure has a bellow (2) that is arranged underside of a flexible side wall (1) of a transition bridge (3). The rollers (15) are releasably mounted at sides of the flexible side wall by a holder, such that flexible side wall is made to surround the roller with a predetermined angle. A strap wrench is arranged on a crossbar of the holder, for guiding belt on the roller.
