Abstract (en)

[origin: EP2565152A1] The apparatus has cassette (30) having first element (61) and second element (62) for guiding the bag material (22). The first side and second side (64) defined by two elements of cassette are spaced from each other. An adjusting mechanism are connected to cassette to adjust the relative position between first element and second element in a direction (60) transverse to the axis (50) of cassette, so that the spacing between sides of cassette. Independent claims are included for the following: (1) plant for producing pocket spring coil; and (2) method for producing pocket spring coil.
