Abstract (en)

[origin: EP2565351A2] The assembly (10) has a handle (20) comprising a handle part (21) and a handle neck (22). A stop body (30) comprises a base body (31). The handle is axially-rotatably mounted on the stop body by a locking sleeve. The locking sleeve comprises a portion (40) in which the handle part faces an upper side of the base body and another portion (50) in which the handle part is faced opposite to a lower side of the base body. The handle neck is fixed in the latter portion of the locking sleeve. The base body comprises a receiving unit (33) for receiving the locking sleeve.
