Abstract (en)
[origin: EP2565726A2] The device has a spring (3) defining a threshold value for providing necessary actuation force on a control unit e.g. pushbutton, such that a control lever passes from a rest position to an actuation position. The control lever includes a projecting element i.e. pin (2), cooperating with the spring. The projecting element includes a guiding unit i.e. circumferential groove, cooperating with another guiding unit i.e. guiding part of spring, mounted on a frame (4) of a timepiece. The groove has a height corresponding to the height of the spring.
