Abstract (en)  
[origin: US2011271968A1] A filter element for a smoking article is provided, the filter element including a first segment of fibrous tow filter material; a second segment of fibrous tow filter material in spaced relation to the first segment; and a cavity positioned between the two segments of fibrous tow filter material, the cavity containing a plurality of breakable capsules having an outer shell and an internal payload comprising a flavorant, wherein one segment of fibrous tow filter material includes an adsorbent material dispersed therein and the other segment is substantially free of adsorbent material. A cigarette that includes such a filter element is also provided.
