Abstract (en)

[origin: WO2011138037A2] The invention relates to solid tapentadol in non-crystalline form in conjunction with a surface stabilizer in the form of a stable intermediate. The intermediate according to the invention comprises preferably tapentadol in an amorphous state or in the form of a solid solution. The invention further relates to the production of tapentadol in solid, non-crystalline form and of pharmaceutical formulations containing solid, non-crystalline tapentadol.
