Abstract (en)

[origin: WO2011138664A2] The assembly of prefabricated elements to form a prefabricated building with two storeys comprises: - a prefabricated hollow structure (W) formed by portions of the walk floors of the ground floor and of the floor above (M, N) permanently connected to one another by means of portions of transverse walls (I) of the ground floor, and - a prefabricated portal structure (V) formed by a central portion (O) of the roof floor of the upper storey connected permanently to two portions of transverse walls (L) of the same storey, said portal structure (V) being designed to be fixed on top of said structure (W).
