Abstract (en)
[origin: WO2011138342A1] The invention relates to a target launching device comprising a surface for supporting a target (5) to be launched and a rotary launch arm (1) capable of applying a launch force on the target. The invention is characterised in that the aforementioned supporting surface (12) has a concave longitudinal profile located in a plane parallel to the rotation plane of the launch arm. The invention is particularly suitable for launching archery targets.
