Abstract (en)

[origin: WO2011138551A1] The invention relates to a terminal (10) comprising a screen (SCR) suitable for displaying graphic objects that can be selected by a pointing device (PTR); a video projector (30) suitable for projecting an image (IM) onto a remote screen (RSCR); and means for including a projected graphic object (RPTR) representing a pointer, referred to as a "remote pointer", in the projected image (IM). The screen of the terminal comprises an area (DZ), the interaction between the pointing device (PTR) and said area (DZ) enabling the control of the remote pointer (RPTR) in the projected image (IM).
