Abstract (en)
[origin: EP2567614A2] Incubator (5) formed as a reactor, which is closed by a door (7), comprises a movable shelf arranged in the interior of the incubator, which is drivable by a shaking actuator along a guide-way of the incubator. The shelf is provided with an upper support plate, which comprises a light-permeable material. An electrically operated lighting device, which is fixed with respect to the incubator, protrudes under the support plate, and is provided with water- or air-cooling system.
