Abstract (en)

The present disclosure relates to a connection article (1) for a support structure of a false ceiling (10), and to said support structure. The article includes a sheet metal body (3) including at least four notches (35, 36, 37, 38) obtained on side edges (135, 136, 137, 138) of said sheet metal body (3), said four notches (35, 36, 37, 38) being located in the region of vertexes of a quadrilateral, said connection article (1) comprising retaining means (352, 362, 372, 382), exerting a retaining action alternately the one from above and the other one from below an ideal plane (P) crossing the notches (35, 36, 37, 38).
