Abstract (en)
[origin: EP2568103A1] The hinge (1) has a column console (3) that is arranged in a motor vehicle body. A door console (2) is connected with a door of the motor vehicle body. A hinge pin (5) is rotationally fixed with the column console and pivotally connected with the door console. The column console and the door console are hingedly connected with each other by the hinge pin. A retaining surface (9) is arranged at locking element arms (8a, 8b). The arms are elastically displaced along direction of a breaking surface (10) by an actuator (11) such that the retaining surface is applied to the breaking surface.
