Abstract (en)

[origin: WO2011141411A1] The present invention relates to a device for producing a sandwich web having at least one coated surface, comprising at least one feed unit for at least one coating web (16, 18), a feed unit (20) for a material (22) to be coated, an application unit (70, 72) for applying an adhesive between the at least one coating web (16, 18) and the material (22) to be coated, and a double web device (26) in which the combination comprising the coating web (16, 18), coated material (22) and adhesive is introduced. In order to cost-effectively generate a spraying pressure, the application unit (70, 72) comprises a gear pump (74), a screw pump, an eccentric spiral pump or a diaphragm pump for generating pressure.
