Abstract (en)

[origin: EP2386647A1] Transfected a eukaryotic cell, comprises (a) contacting a composition comprising at least one saccharide and at least one protein, and optionally a salt and/or a pH-value stabilizing component, with a nucleic acid and a transfection reagent; (b) forming a complex of nucleic acid and transfection reagent in interaction with the composition from step (a); and transfected the eukaryotic cell by the complex from step (b).
