Abstract (en)
[origin: WO2012062238A1] The invention relates to a conductor arrangement (1), which has several groupings (2), consisting of a plurality of stranded wires (3) arranged in parallel, wherein the stranded wires (3) are formed from a plurality of conducting strands (4) insulated from each other, groups of groupings (2) are interwoven with each other to form braids (5), and a plurality of braids (5) is stranded to form the conductor arrangement (1). The invention further relates to the use of the conductor arrangement for transmitting energy without contact for transport systems.
