Abstract (en)
[origin: EP2570234A1] The carrier (1,1') has holding fingers (3) that are vertically projected from base (2). A space (4) is formed opposite to front side (7), such that workpiece (5) is accessed from the outside. A holding finger is provided with support ribs (11) which are located perpendicular to longitudinal axis of holding finger and spaced from one another. The holding arm, base and support ribs are made of a common plastic material by injection molding.
