Abstract (en)
[origin: EP2570559A1] The drainage channel (1) has a transverse reinforcement unit with a coupling unit that couples a channel frame (3) to a base body (2). The coupling unit is positively coupled, particularly with a rear grip connection, where the coupling unit has an approximately arrow-like shape. A molding unit (12) is arranged on one side of the channel frame, particularly on an outer side of a longitudinally extending wall of the channel frame. A receptacle (11) for receiving the molding unit is arranged on one side of the base body.
