Abstract (en)

[origin: EP2570736A1] The vapor extraction device (1) has extractor hood (10) and air conditioning device (11) which is active air purification device. A determination unit (15) determines the remaining service life of odor filter element and plasma source of the air conditioning device. The determination unit is connected with fan (102) and controller (106) of the hood to obtain information about an operating state of the hood. An independent claim is included for method for operating vapor extraction device.
