Abstract (en)

A brush holder for holding a contact brush to contact a sliring is disclosed. It has a housing made of an insulating material and enclosed therein at least one metal insert for holding the contact brush. The metal insert has a rectangular cross-section and is made of one piece of metal sheet defining three sidewalls to hold the contact brush at three sides. Furthermore the insert has a spring element at the fourth side to assert side pressure to the brush. The length of the spring element is larger than the partial length of the contact brush within the metal insert.
