Abstract (en)

[origin: US2011286798A1] Disclosed herein are embodiments of floating structures, with one embodiment comprising floating, modular, parallelepipedic blocks whose vertical edges are provided with lugs in which connecting elements are inserted in order to assemble said blocks. The connecting elements entail a support key, which at its upper part bears stanchion extending above upper surface of the floating structure, said stanchion being provided with an eyelet capable of constituting a point of attachment for net. One or more anchoring points are situated below and to the interior of said floating structure. Also disclosed are applications of the floating structures, including as anti-pollution barriers.
