Abstract (en)
[origin: WO2011146627A1] Packages and methods having a flexible film (12) defining an interior contents cavity and having a first pair of opposing edge portions forming a first end seal (18), a second pair of opposing edge portions forming a second end seal (20), and a third pair of opposing edge portions forming a longitudinal fin seal (14) extending from the first end seal to the second end seal; the body having a first side portion having the longitudinal fin seal and a second side portion generally opposite the first side portion; a score (42) formed in the flexible film at the second side portion and defining an opening to the contents cavity upon initial rupturing and configured to propagate film tear longitudinally towards the second end- seal; a closure label (40) covering at least portion of the score, but less than the entire score; and a pressure sensitive adhesive being between the closure layer and the flexible film.
