Abstract (en)

[origin: WO2011145948A1] The present invention relates to a system (1) for laying or stacking elongate elements (5), which system (1) comprises a raisable and lowerable stacking frame (2) and an inclined raisable and lowerable receiving frame (3) arranged adjacent to each other, so as to cooperate with each other during laying or stacking of the elongate elements (5), where the stacking frame (2) and the receiving frame (3) are constituted of separate units that can be operated independently of one another. The present application also relates to a method for laying or stacking elongate elements (5) in a storage device (4).
