Abstract (en)
[origin: WO2011144949A1] A dispenser (1) for a roll (3) of film material, comprising a cutting arrangement for cutting polyethylene having an upper portion (2) and a lower portion, the upper portion being configured to move in relation to the lower portion between an open position and a cutting position. One of the upper portion and the lower portion comprises a blade (4), and the other of the lower portion and the upper portion comprises a cutting channel defined by a first pair of legs (6). The legs include at least one surface (11) configured to reduce slip of film material across that surface.
