Abstract (en)  
[origin: US2011287048A1] Antigen specific regulatory T cells are described and related compositions, methods and systems. Methods to generate an antigen specific anti-inflammatory regulatory T cell is provided, the method comprising contacting either a T cell or an antigen presenting cell with a zwitterionic polysaccharide conjugated to the antigen for a time and under condition to generate an antigen specific regulatory T cell that is capable of inhibiting a pro-inflammatory response against the antigen.
