Abstract (en)  
[origin: EP2572619A2] The vacuum cleaner housing (100) has a bottom surface (110) which extends parallel to a longitudinal direction (120) of the vacuum cleaner housing. A vacuum cleaner housing faces a bottom (130) in an operating position, where a rear surface (140) extends vertically to the longitudinal direction of the vacuum cleaner housing. Two wheels (170-1) are arranged at side surfaces (160-1) lying opposite to each other. The wheels create a contact point (180-1) to the bottom in the operating position and storage position.
