Abstract (en)

[origin: EP2572830A1] The grinding block (1) has base plate (3) for grinding and/or for holding grinding portion and two abrasive block elements (2). The base plate is configured flexible, and connected with abrasive block elements in a state movable relative to each other. An adjusting unit is provided to move or ascertain that abrasive block elements are movable relative to each other or movable relative to an edge region of the base plate. An independent claim is included for kit comprising grinding block.
