Abstract (en)

Cover member (1, 30) for covering an opening (20, 43) in a wall of a cargo space, wherein the cover member is provided with a front side (2, 31) having a flat surface and a back side (3, 32) comprising a sliding member (7, 33) matching the width of the opening. In a specific embodiment the back side (3) of the cover member comprises a first end (4) with a gripping member (5) and an opposite second end (6) provided with the sliding member (7). The gripping member has a recess (8) facing away from the sliding member, which forms a first contact surface of a width corresponding to the thickness of the wall (21) at the edge of the opening (20). The sliding member comprises a second contact surface (12) facing away from the gripping member (5). The contact surfaces (8, 12) are configured to form a tight fit between opposite edges of the opening.
