Abstract (en)

[origin: EP2573228A2] The machine has a feeding device (7) for feeding the fiber material (4) into a spinning device (2), and a winding device (8) for winding on the produced yarn (6). A spinning point (1) includes a yarn end disposal unit (9) which is partly arranged between the outlet (5) of the spinning device and winding device. The end section of the produced yarn is separated from the rest of the yarn and removed with yarn end disposal unit. An independent claim is included for method for removing end section of produced yarn.
