Abstract (en)  
If a yarn joining operation is required to be executed with respect to a spinning unit (2) facing an overlapping region (T), that is, a spinning unit (2) that can receive the yarn joining operation from a first yarn joining cart (31) and a second yarn joining cart (32), a yarn joining cart (3) to execute the yarn joining operation is selected in accordance with an occurrence status of a yarn joining request made from the spinning unit (2) facing exclusive regions (S1, S2) of each yarn joining cart (3). The yarn joining cart (3) is selected according to processing ability with respect to the yarn joining request, and the yarn joining operation can be executed with respect to the spinning unit (2) facing the overlapping region (T) by the selected yarn joining cart (3).
