Abstract (en)
[origin: EP2573278A1] The tool carrier has a tool carrier frame (22), and tool retainers (20, 20') formed at the carrier frame. The retainers are designed as plug-in elements. Retaining slots (50) are formed at the carrier frame, where the retainers are plugged on the retaining slots. Storage slots for storing the plug-in elements are formed at the carrier frame, and a u-shaped retaining part for accommodating a hanging bolt is formed at the plug-in parts. A holding plate (48) is formed at one of the retaining slots, and a locking pin (58) i.e. spring connector, is formed at the storage slots.
